26. July 2019

Subject: Discontinuation of TX23D200_201VM0BAA_BPA
Product discontinuation notice update 26th July 2019

Dear Customer,

we deeply regret to inform you that we currently have to reject all NEW P/O's, including LTB P/O's, due to a very limited quantity availability on TX23D200 and TX23D201.
In order to support strictly production quantity only, we kindly ask you to inform us as soon as possible about your total demand needed to support production until January 20, in order that we can make an allocation.
As you know a NEW 9" WVGA (TX23D202/203) fully compatible is currently under development from KOE and we plan to deliver further samples for customers evaluation and qualification process by M/Aug.
We are fully aware of the urgency of this topic, therefore we are planning to support production parts within January 2020 trying to reduce L/T as much as possible.

We remain at your disposal for any further information.

Best Regards

Habel Matthias
GM Sales
